SUMMARY

Full Stack Python Developer and AI/ML Engineer at Impactsure Technologies, specializing in LLM fine-tuning, Retrieval-Augmented Generation (RAG) pipelines, OCR, and multi-agent AI systems for banking-sector clients. Experienced leading engineering teams and delivering AI solutions end-to-end, from model training through production deployment.

SKILLS

Languages: Python, Java, C++, JavaScript
AI / ML & LLM: FinBERT, Model Training & Fine-Tuning, RAG Pipelines, Multi-Agent Systems, OCR, Voice Recognition, Prompt Engineering
Full-Stack & Web: Django, React, Node.js, REST APIs, HTML, CSS
Data & Tools: SQL, MySQL, Oracle DB, Vector/Embedding Search, Git, VS Code, Google Colab, Jupyter Notebook, Linux, Windows
Leadership: Technical Team Leadership, Cross-Functional Client Communication, Problem-Solving, Adaptability

EXPERIENCE

Full Stack Python Developer — Data Science & AI/ML **Dec 2024 – Present**
Impactsure Technologies Pvt. Ltd. *incl. 6-month internship, Dec 2024 – May 2025*

- Build AI/ML-driven products as a Full Stack Python Developer for banking-sector clients, including SBI, HDFC Bank, Axis Bank, and IndusInd Bank.
- Serve as Tech Lead, leading Impactsure's 8-member team on the Axis Bank BG (Bank Guarantee) project, owning quality of delivery and consistently shipping ahead of deadlines.
- Fine-tuned FinBERT and LLM models for Bank Guarantee (BG) document classification, supporting compliance and risk-review workflows.
- Built OCR pipelines achieving 98.5% extraction accuracy on complex, unstructured bank documents.
- Designed RAG-based document analysis pipelines for CAM (Credit Appraisal Memo) documents, achieving 97.3% retrieval accuracy.
- Architected a multi-agent AI system with integrated voice recognition for automated conversational workflows.
- Deployed AI/ML applications directly on client bank servers, ensuring smooth, stable production rollouts within secured, regulated banking infrastructure.

PROJECTS

Bank Guarantee (BG) Document Intelligence System (Impactsure Technologies) — End-to-end pipeline from OCR to entity extraction for Bank Guarantee documents, structuring unstructured scanned data for compliance and risk workflows.

Onerous Analysis Model (FinBERT) (Impactsure Technologies) — FinBERT-based classifier that identifies and flags all onerous clauses within a given BG document; achieved 92.8% accuracy on complex, real-world documents.

TryOn (Virtual Wardrobe) — Full-stack virtual try-on platform (Python, Node.js, React) with Firebase and Razorpay integration. — View Code

Facial Recognition Attendance System — ML/computer-vision attendance system (Python), prototyped in Colab/Jupyter. — View Code

CERTIFICATIONS

- Data Science / Language Processing Project — NullClass (Review, Certificate)
- Data Visualization Simulation, Power BI & Tableau — Tata Consultancy Services (Certificate)
- SCRUM & Team Coordination, Volunteer Coordinator — Serendipity Arts Festival (Certificate)

EDUCATION

Master of Computer Applications, Goa University **2024 – 2026**
Final CGPA: 8.03

Bachelor of Computer Science, Dhempe College Of Arts And Science **2023 – 2024**
CGPA: 8.31

Secondary School, Kendriya Vidyalaya Bambolim Camp Goa, CBSE Board **2018 – 2019**
Final Percentage: 66.4

Higher Secondary School, Kendriya Vidyalaya Bambolim Camp Goa, CBSE Board **2020 – 2021**
Final Percentage: 66.2

EXTRA-CURRICULAR ACTIVITIES

Youth Football Player for Goa (youth-level state representation); Participant, Reliance Football Competition (Certificate)
